

## Further Research Necessary

*All of the insulators pictured here are not pintypes, but are some of the unusual glass insulators that have been found. Further research needs to be done in order to understand their insulating applications as well as the history of their manufacture. Pictured (above) are two views of the same "three finger" insulator. (Courtesy of Bob and Phoebe Adams collection)*

*Pictured (above) is a glass hook embossed "PAT. APP. FOR.". (Courtesy of Tommy Bolack collection)*

*Pictured (below) is a "slim pin" insulator. (Courtesy of "Butch" and Eloise Haltman collection)*
